

PHOTOGRAPHY MINOR

The Photography minor is designed for the student who wishes to pursue courses in photography in addition to those in his/ her major field. Photo minors will gain a skill set that will not only complement their major but will also add photographic proficiency to their post-academic careers. Since almost every business uses photography in some way, the possibilities for employment are extremely diverse.

The Photography minor offers a flexible curriculum that will introduce students to a range of practical experiences in the digital lab, darkroom, studio, and working with people. It will also encourage students to think critically and understand the complexity of photographic images. Students will be encouraged to participate in study abroad, internships, and extracurricular activities. These experiences will allow students to gain valuable real-world knowledge that lasts long after graduation.
