PSYCHOLOGY, B.A.

Millersville University’s Psychology BA prepares students to be well versed in many aspects of psychology, qualifying them for graduate school or a job in an incredibly diversified field. The program exposes students to both the humanistic and the more traditional experimental approaches to the study of behavior. Curriculum flexibility allows psychology majors to prepare for graduate training in psychology and related fields, or for employment in a variety of human service or business and industrial areas. Through learning experiences in and out of the classroom, our undergraduate program prepares students who are well-versed in psychological theories and scientific methodologies and who demonstrate cultural sensitivity and embrace a variety of points of view.

Major in Psychology, BA
