APPLIED ENGINEERING & TECHNOLOGY MANAGEMENT, B.S. - NANOFABRICATION MANUFACTURING CONCENTRATION

The Nanofabrication Manufacturing Technology program at Millersville University prepares students for the forefront of technological innovation. This concentration within the Applied Engineering & Technology Management (AETM) program offers an education that can be applied to nearly any industry. As the demands for faster computers, tailored healthcare and energy efficiency increase, nanoscale science and engineering are more important than ever. A well-trained workforce will be critical to filling the need. Graduates of this program will be prepared to work in information technology, energy, environmental science, medicine, homeland security, food safety and transportation among many others.

Students will graduate with a Bachelor of Science in Applied Engineering & Technology Management with a concentration in Nanofabrication Manufacturing Technology.
