BIOLOGY, B.S. - ANIMAL BEHAVIOR OPTION

The Animal Behavior option in Biology is designed for students who wish to specialize in the study of animal behavior, the scientific study of the causes, functions, development, and evolutionary history of behavior. Students will be prepared for careers in education, whether in a classroom or at an aquarium or zoological garden; research, whether sponsored by companies, universities or the government; animal-human interactions, including both pet and livestock management; and animal conservation biology.
