

ENVIRONMENTAL & SPATIAL SCIENCES, B.S.

Millersville University's Bachelor of Science program in Environmental and Spatial Sciences prepares students as environmental scientists with advanced training in geospatial technologies, including: geographic information science (GIS), global positioning system (GPS) technology, remote sensing, data management, and cartography. Graduates of the program are well-positioned for careers in environmental analysis and mitigation of environmental problems. Through coursework in the program, students assess environmental and human-environment systems, identify and evaluate environmental problems, and design innovative and sustainable solutions.

The program is housed in the Department of Geography. 60 credits required in addition to required related courses applied to the general education program.
