PHYSICS, B.A. - NANO TECHNOLOGY OPTION

The B.A. (Bachelor of Arts) in Physics allows the greatest breadth of experience in designing a physics major curriculum. A year of a foreign language is required (two years of a foreign language in high school will satisfy this requirement). The flexibility of the B.A. program allows students to choose their courses to satisfy a wide variety of intellectual interests. The Nanotechnology option, taught in collaboration with Penn State University, includes 18 credits earned at the Penn State Nanofabrication Facility.
