

MULTIDISCIPLINARY STUDIES, B.A., EDUCATIONAL STUDIES OPTION

The Educational Studies (MDST ES) concentration prepares Millersville students for work in the field of education, outside of public schooling. This unique concentration recognizes the important educational opportunities provided by social service agencies, museums, private schools, for-profit organizations, government agencies, new education start-ups, and so on. Students who enroll in the MDST ES concentration will take classes that will prepare them to think about teaching and learning in diverse settings, and will match them with valuable field experiences and internships according to their interests.
